VIVASCOPE

Work at VivaScope

One team. One goal. We want to save time, with innovative medical products & workflows. VivaScope GmbH is a Munich-based company that has been operating under the umbrella of MAVIG GmbH for 15 years. Since January 2021 we are operating as an independent company.
Are you as fascinated by medical technology as we are? Our confocal laser scanning microscopes are changing cancer diagnostics with state-of-the-art technology - for patients and doctors worldwide. **And that's exactly why we need your support.**

We are looking for interested, motivated **apprentices** who want to revolutionise medical technology together with us. We will support you on your way to a successful apprenticeship. Immerse yourself in the fascinating world of VivaScope.

Apprenticeship in wholesale and foreign trade management

Your Tasks:

- Understanding different areas of a modern international trading company, e.g. sales, procurement, warehouse, logistics, dispatch
- Preparation of quotations and orders / accounting
- You will get to know the parcel delivery and processing processes from A to Z
- Compile product range and plan/control procurement logistics
- Planning the tours for our international trade fairs
- Performing commercial management and control
- General administrative and office work

Your Profile:

- You have at least a secondary school degree or a comparable qualification
- You enjoy working in an international team and are able to speak English at B1 level
- You are interested in logistical relationships
- An open-minded and friendly appearance is part of your personality
- You are well motivated and committed
- You are a team player
- Enjoy working with IT programmes to round off your profile.

What We Offer:
The support of a professional team, intensive supervision, as well as all the opportunities of an expanding, internationally oriented company with flat hierarchies and short communication channels. You can expect a modern, flexible working environment in new, well-equipped offices with the option of home office. International and growing company, with useful technologies to change diagnosis for patients worldwide.

If you enjoy working in a technically demanding environment and are interested in varied and complex tasks, we look forward to receiving your informative application documents by e-mail in PDF format.

- Flexible working & homeoffice
- Modern offices
- Young and diverse team from different nations
- Individual opportunities for further training
- Staff events
- Short decision-making-processes and short communication channels
- 30 days vacation
- Company pension plan
